

CLINICAL WASTE SERVICES

Grundon Clinical Waste Packaging

A Clinical Operation

Grundon are currently operating a very reliable and efficient clinical waste disposal service in your area. We would like to take this opportunity to introduce our company and the services we have to offer.

Grundon is the **largest privately owned, family run waste management company in the UK.** We pride ourselves in offering an excellent service tailored to our customers' individual needs. Our partnership approach with customers ensures that you will receive advice on Environmental and Legislative issues, which means that you will always have peace of mind regarding all your "Duty of Care" obligations under the *Environmental Protection Act 1990*.

The clinical waste service is provided using dedicated vehicles conforming to the relevant guidelines, operated by highly trained drivers. We can provide a collection to suit your requirements as we take pride in the fact that we like to give *you* what you want and not what is convenient for us.

ALL services are in compliance with the new January 2002 packaging requirements for transport on the road.

Grundon do not believe in lengthy contractual obligation – unless requested to do so. We believe that if we are offering a good, reliable service at the right price, you will stay with us and give us your support. Part of our commitment is the provision of a contract supervisor to manage all queries and provide that extra service to you.

All your clinical waste will be incinerated at our site at Colnbrook in a 1 tonne per hour high temperature incinerator, which is fitted with the latest technology gas clean up system to ensure that the emissions meet the most stringent standards in the EC.

We can also supply you with all of your packaging needs with a variety of UN approved packaging including heavy duty sacks, sharps bins and hermetically sealing one-way burn bins. This can then be combined with a full range of bins designed for outside storage, or an exchange wheel bin service for those of you with a large amount of clinical waste that needs to be stored safely.
