

Waste Collection Services

Waste Wheelers *for recyclables (mixed or individual), general waste*

Waste wheeler containers are constructed of a tough lightweight plastic, with hinged lids and castoring solid rubber wheels for ease of movement. The containers are collected on a regular scheduled basis by agreement with the customer. This service is ideal for shops, smaller offices, pubs and restaurants. For organisations with very small amounts of waste we can provide a plastic sack-based service.

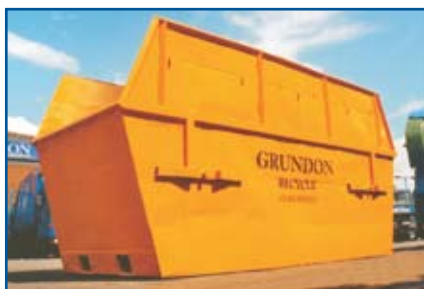

Sizes: 1100 litre (c.12-14 sacks), 660 litre (c.6-7 sacks), 240 litre (c.3-4 sacks)

Front-End Loaders *for recyclables (mixed or individual), general waste*

Our collection vehicle will call on a scheduled basis or on demand. All waste is tipped into the vehicle and compacted on site within its body to minimise vehicle movements. The FEL containers remain on the customers' premises at all times. Front end loaders provide the most, clean, efficient and economical solution for shopping centres, markets, exhibition halls, showgrounds, leisure facilities and retail centres.

Sizes: 4.5 m³ (6 yd³), 6.0 m³ (8 yd³), 7.5 m³ (10 yd³)

Skips *for construction waste, furniture, clearances*

Conventional open 'builder's skips'. Whether you need an occasional skip or a regular contract, for general use or a specific application, we can offer you the right container for the job. Your local depot will advise you on the full range of skips available including those with special features.

Skips are the ideal solution for awkward and heavy wastes and 'one-off' situations, for example office clearances.

Sizes: 4.5 m³ (6 yd³), 9.0 m³ (12 yd³), 15.0 m³ (20 yd³)

Compactors *for recyclables (mixed or individual), general waste*

Our electrically powered, portable or static compactors are often the most economical option for customers generating substantial volumes of low density dry wastes. Using hydraulic rams to compress the waste within the container, advantages include economy, cleanliness and improved security. Containers are collected either according to an agreed schedule or on demand. All of our compactors are quickly and efficiently installed, and maintained by our own service engineers. Suitable for customers with larger and easily accessible sites.

Sizes: 10.7 m³ (14 yd³), 25.0 m³ (20 yd³), 27.0 m³ (35 yd³)

Rolonofs *for bulky waste, construction waste, office clearances, recyclables*

High-sided steel containers for collecting and handling large volumes of bulky low and medium density dry wastes. The containers feature opening end doors for ground level loading access.

Provided on a regular contract or "on demand" basis, we will leave an empty container of the required capacity on your premises for loading and collecting. Rolonofs provide an economical solution for the handling of bulky dry wastes in situations where on site compaction is not practical.

Sizes: 11.5 m³ / 15.0 m³ (15 / 20 yd³), 23.0 m³ (30 yd³), 30.0 m³ (40 yd³)

GRUNDON

Waste Collection Services

Tankers *High capacity tankers for liquid and powder waste*

Suitable for customers needing to dispose of liquid waste, most types can be collected including flammable liquids. Typical wastes collected include: interceptor waste; spray booth waste; rinse waters; effluent treatment plant waste; caustic strippers and cleaners; pharmaceutical and pesticide contaminated liquids; industrial and domestic sewage. We also operate a high pressure jetting service to complement the tankers when collecting more awkward high-solids content wastes.

Clinical Waste *Tel: 01628 501591 or email: clinical@grundon.com*

Clinical Waste can originate from a wide variety of sources including medical, nursing, dental, veterinary, pharmaceutical or other practices. It includes radioactive waste and may also come from enterprises or establishments involved in investigation, teaching or research. Grundon provides a Total Hospital Waste Management service, or a Specialist Waste Management service for non-hospital sites. In each case the service includes: Site visit; Waste arising and compliance audit; Comprehensive documentation; Training in segregation and minimisation; Packaging options, including wheeled bin exchange service; Dedicated collection vehicles; High temperature incineration and steam sterilisation (Hydroclaving) disposal options.

Hazardous Waste *Tel: 01491 834340 or email: technical@grundon.com*

Hazardous waste originates from a wide variety of sources including industrial sites, garages, warehouses, offices, construction sites, colleges and universities. The management of hazardous waste is subject to stringent regulation and waste has to be correctly identified & classified prior to movement. Grundon provides a complete service using technical specialists for all aspects of hazardous waste disposal, from initial site visit & waste listing through to collection. Our team includes DGSA's, degree educated chemists and ADR qualified drivers.

We operate a hazardous waste transfer station and a high temperature incinerator, and specialize in accepting mixed loads with an emphasis on recycling, including aerosols, batteries, fluorescent tubes, WEEE, waste oil, paints, thinners and solvents, lab smalls and contaminated packaging. We also offer a full range of specialized containers for high volume hazardous waste.

Haz-Box *Tel: 01491 834340 or email: technical@grundon.com*

For hazardous waste volumes under 50kg we offer our **Haz-Box** collection service. Specifically tailored to meet the needs of producers who generate small volumes of hazardous waste such as aerosols, batteries, paints and adhesives, contaminated rags and wipes, oils and cleaning chemicals, the Haz-Box provides a cost effective method of ensuring that waste producers remain compliant with the latest disposal legislation.
