

Hazardous Waste Treatment and Landfill

Grundon Waste Management Limited will be one of the few companies operating a Hazardous Waste Landfill after 16th July 2004. The Bishops Cleeve Landfill, which is just north of Cheltenham, has been operating for over 13 years and will have the continued capability to accept a wide range of packaged and bulk hazardous wastes. Grundon will operate a treatment plant at this site, which will ensure compliance with the requirement to pre-treat hazardous wastes, as well as being able to meet the long awaited Waste Acceptance Criteria.

INITIAL ANALYSIS / COMPLIANCE TESTING / INSPECTION / TREATMENT / DISPOSAL

The PPC permit for the Bishops Cleeve Landfill will enable Grundon to treat and landfill a comprehensive list of hazardous wastes. These include:

- Contaminated soil
- Filtercakes
- Industrial chemical wastes
- Contaminated packaging, rags, wipes and absorbents
- Asbestos
- Drummed hazardous wastes
- Bulk hazardous wastes

As a complete waste management company we can also offer

- Collection service by our fleet of ADR vehicles for all packaged wastes as well as bulk liquids and solids
- Hazardous waste transfer stations in Oxfordshire, able to accept almost all types of both packaged and bulk hazardous wastes
- Recycling of many hazardous wastes, including paints, inks and resins, batteries (almost all types), aerosols, LPG cylinders, fluorescent tubes and sodium lamps
- Incineration of clinical, pharmaceutical and chemical waste at our Colnbrook Incinerator
- Chempack chemists for the listing, collection and disposal of lab smalls
- Animal by-product collection and disposal service
- Comprehensive container and collection service for all types of general wastes; much being recovered through the Grundon MRF's
