

# Cookies

## About cookies

Cookies are text files containing small amounts of information which are downloaded to your device when you visit a website. Cookies are then sent back to the originating website on each subsequent visit, or to another website that recognises that cookie. Cookies are useful because they allow a website to recognise a user's device.

Cookies do lots of different jobs, like keeping track of the choices you make during your visit to that website, letting you navigate between pages efficiently, remembering your preferences, and generally improve the user experience. They can also help to ensure that adverts you see online are more relevant to you and your interests.

As well as the site setting cookies it is possible for them to be set by a third party, these are known as third party cookies.

You have the ability to accept or decline cookies by modifying your browser settings. However, doing so may prevent you from using this website.

You can find out more about cookies and how to disable them at [allaboutcookies.org](http://allaboutcookies.org)

## How we use cookies

We use cookies on this website to:

- Collect anonymous information on the pages visited using Google Analytics and other cookies
- Collect anonymous temporary session information to ensure that you are recognised when you move from page to page within one site and that any information you have entered is remembered

The cookies used on this website have been categorised based on the categories found in the International Chamber of Commerce UK Cookie Guide. This defines four categories of cookies based on what they are used for and the sort of information they store:

### Strictly Necessary

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. Without these cookies services you have asked for, like shopping baskets or e-billing, cannot be provided. We do not require your consent for use of these cookies.

### Performance

These cookies collect information about how visitors use a website, for instance which pages visitors go to most often, and if they get error messages from web pages. These cookies don't collect information that identifies a visitor. All information these cookies collect is aggregated and therefore anonymous. It is only used to improve how a website works.

### Functionality

These cookies allow the website to remember choices you make (such as your user name, language or the region you are in) and provide enhanced, more personal features. For instance, a website may be able to provide you with local weather reports or traffic news by storing in a cookie the region in which you are currently located.

These cookies can also be used to remember changes you have made to text size, fonts and other parts of web pages that you can customise. They may also be used to provide services you have asked for such as watching a video or commenting on a blog. The information these cookies collect may be anonymised and they cannot track your browsing activity on other websites.

### **Tracking**

These cookies are used to deliver adverts more relevant to you and your interests. They are also used to limit the number of times you see an advertisement as well as help measure the effectiveness of the advertising campaign. They are usually placed by advertising networks with the website operator's permission. They remember that you have visited a website and this information is shared with other organisations such as advertisers. Quite often targeting or advertising cookies will be linked to site functionality provided by the other organisation.

Any enquiries about how we use cookies should be addressed to:
