

## CORPORATE ENVIRONMENTAL POLICY STATEMENT

### Objective

Grundon is committed to preserving the environment and to minimising any adverse impacts associated with our activities. This commitment will require the continuous improvement of our operational methods and working practices, including the adoption of sustainable waste management systems.

### Policy

We will achieve our Environmental Objectives by:

1. Operating at all times in accordance with all relevant legislation, approved Codes of Practice and statutory guidance. Employees are required to adhere to this Policy and environmental procedures for their activities within Grundon.
2. The implementation and operation of accredited environmental management systems.
3. The education of our workforce to ensure continuing awareness and sensitivity to environmental issues.
4. Engaging with customers, suppliers, contractors and regulatory authorities to encourage a co-operative approach to minimising environmental impacts, including promoting waste recycling and recovery both within Grundon and to our customers.
5. Minimising our consumption of natural resources, by investing in clean and energy efficient technologies, fuel-efficient vehicles and constructing sustainable waste management facilities.
6. Monitoring our environmental performance to establish benchmarks for continuous improvement. Monitoring the emission of greenhouse gases associated with our activities, in order to target reductions in our environmental impacts.
7. Ensuring a high standard of management at our facilities, including where possible the beneficial utilisation of the restored land, improving biodiversity and exploiting landfill gas to generate electricity.
8. The compilation and publication of a Corporate Environmental Report, following established reporting guidelines issued by the Green Alliance.
9. The regular review of our objectives and targets to take into account the views of both internal and external stakeholders.
